

Tightening Development

Right from the start

Atlas Copco's Tightening Development provides:

Improved first time joint quality

Decreased design time

Reduced risk of joint failure

Reduced cost of warranty

Tightening Development

Minimize the risk of joint failure

No systematic tightening support
could lead to:

Limited tightening specification

High warranty cost

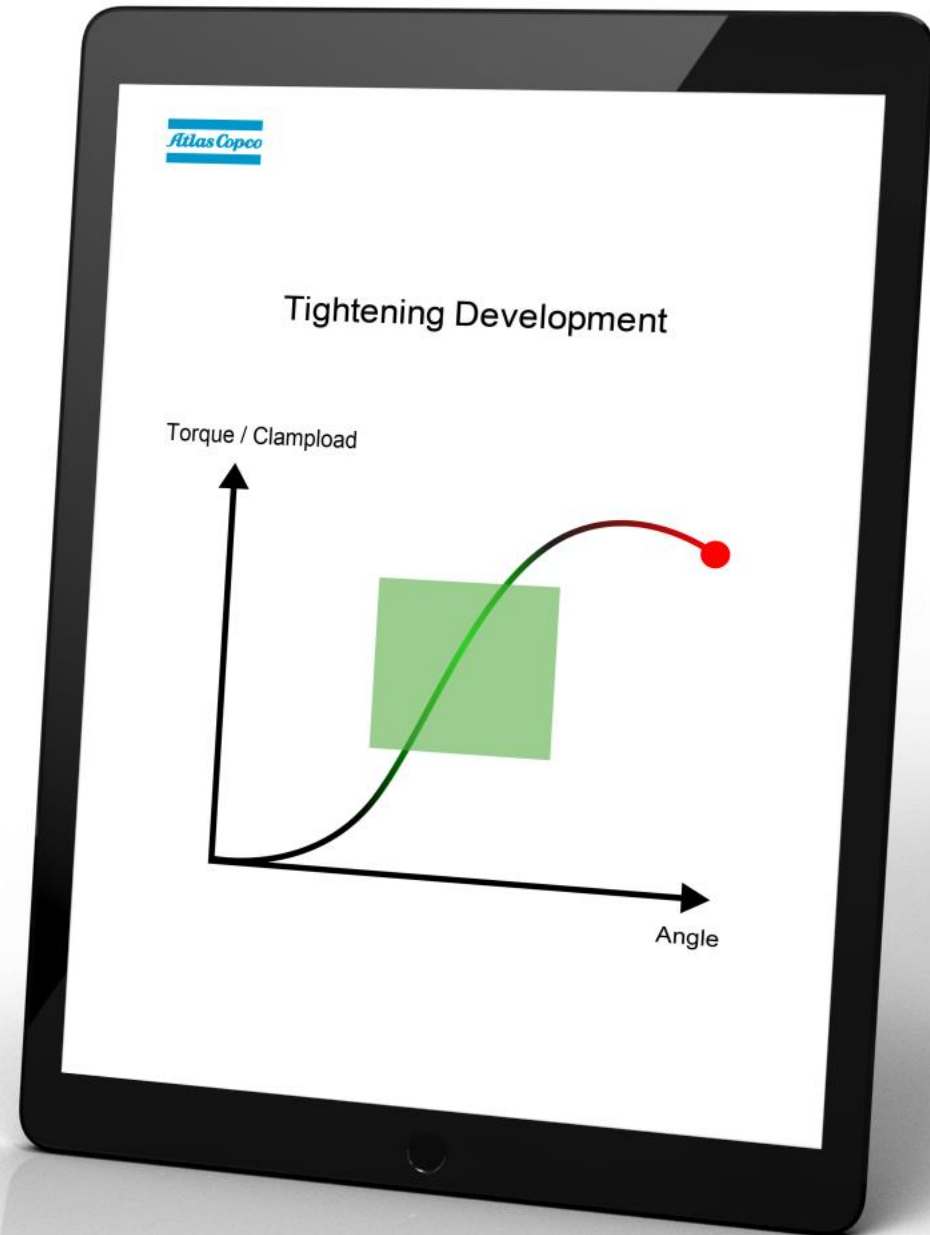

Limited reliability

Risk of joint failure

Deliverables

- Tightening Development report
- Tightening strategy recommendation
- Tool specification recommendation to ensure process capability
- Field implementation (optional)

Tightening Development

With Tightening Development you maximize your bolt performance and minimize the risk of joint failure. Our highly skilled team of engineers can improve the integrity of your bolted joints and decrease the Time-To-Design.
